Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant was given the opportunity to briefly describe the invention, where the features believed to be novel were described in each independent claim and why applicant believes the claimed invention is different than the prior art of record. Examiners Chandler and Patel provided suggestions that would help clarify the claimed invention and advance prosecution. Suggestion included: 1) Incorporating in the independent claims that the method/system is automated. Similarly, it may be better to make the first limitation "receiving..." rather than "providng." In other words the dealing quotes are like an input that is received by the system, the calculating steps are how the system is computing the information and the output is the adjusted deating quote. 2) Clarify that the plurality of dealing quotes comprises quotes that are still pending and quotes that have expired, but it is only the pending quotes that are part of the computations. 3) Define with specificity what dealing quotes and exposure are. 4) Distinguish between dealing quotes and future dealing quotes. 5) Clarify the adjustment that is to occur with respect to the future dealing quotes. 6) Check all claims to make sure amendments to not create 101 (e.g., useful,concrete, tangible result), 112 (e.g., antecedent basis), and grammer issues.
